**Dear Parent:**

It has been a pleasure to become a part of the Metcalf "family" this year. The students, parents and faculty have been most friendly and helpful in the adjustment of the Freemans to life in Normal. We have found this school very exciting with its wide variety of programs and activities. Most important, it is a place where people want to be — not where they have to be.

We were very impressed with the long proud history of Metcalf and Illinois State University. This was the one hundred and twentieth year of leadership and service to the profession. The national, and international reputation of the university and its "model" school spans a century. Its board curriculum and careful attention to individual human needs of children has been an example for other schools for many years. The loyalty felt by alumni is demonstrated by the appointment of some former students to the faculty.

Among the many interesting programs we have witnessed this year were the Artist-In-School Program, reverse mainstreaming, metric workshop, & health curriculum. The Artist-In-School program featured movement and dance which was especially exciting for the deaf. Reverse mainstreaming placed hearing children with the hearing impaired for social studies over a nine week period. The metric workshop helped us to prepare for the eventful shift to metrics. The health curriculum is an innovative response to recently mandated legislation. Perhaps the most exciting part of these other activities is that they are frequently observed by University students and others concerned with education.

In concluding I would like to suggest that it is not enough to have a proud past or an interesting present. We have a promising future as well and I have confidence in the students, parents and faculty who will shape the future of our school and its impact upon the teaching profession and society. I am grateful to have a part in this enterprise and look forward to many happy years of association with the Metcalf "family."
